TEST EVERY VEHICLE

WHY TESTING EVERY VEHICLE IS BENEFICIAL TO YOUR BUSINESS

DID YOU KNOW

Each year, **\$60 billion** in needed repairs are not performed. Customers are keeping their cars longer and preventive care, like testing, can uncover key repairs that increase your business and help keep your customers safe on the road.

Manufacturers are adding more electronics, creating more demand on the batteries and charging system, which are critical for the vehicle to start.

Incorrect battery installation can lead to vehicle damage - an OE AGM battery can only be replaced with another AGM battery.

Testing the vehicle and providing the results allows customers to deal with issues before they become an inconvenient, expensive, or potentially dangerous situation.

NAPA recommends offering a quick 3-minute electrical system test to every vehicle in your shop. If you're not performing testing checks, you're missing out.

VEHICLES ON THE ROAD TODAY

The average age of U.S. vehicles on the road rose to 12.7 years in 2024 and is expected to hit 13 years by 2026

8% will replace an *alternator* or *starter* this year

25% will replace a *battery* this year

87% of people replace *battery* when shop test shows weak power

When the battery terminal corrodes on certain Ford vehicles, the dealership often makes you buy an entire new cable to replace it. This Dorman® OE FIX® solution allows direct replacement of only the terminal, potentially saving hundreds of dollars.

The original-style adjustable battery terminal hardware can become lost or damaged during service. This Dorman® OE FIX® cable terminal adjuster matches the specialized original hardware to complete the repair without replacing battery cable.

This replacement battery current sensor matches the fit and function of the original part to restore proper monitoring of the battery. Made of quality materials for reliable service, it connects directly to the factory wiring.

Oldsmobile 1999, Pontiac 2005-00

These battery components—including fuses and current sensors—are designed to match the fit, function, and performance of the original parts on specified vehicles. Made from quality materials with factory-style connectors, they offer durable, reliable performance and are backed by U.S.-based experts with over a century of automotive experience.

Oil Filter Housing Kits

Design Improvements to Prevent Leaks

The oil filter housings on the Pentastar V6 are known for leaking. That is why our Oil Filter Housing Kits feature multiple design improvements to prevent oil leaks. Best of all, they are factory assembled with new sensors installed and include new manifold gaskets.

LOOKS RIGHT. FITS RIGHT. PERFORMS RIGHT.
